

satellite radio has been the best thing that has happened to our family in a long, long time especially because we live in small secluded town in western arizona. we are limited to any decent radio station here. i farm about 2,500 acres, listening to a station that is in our area is very dissapointing. with satellite radio we have access to so many types of music and news stations that it makes farming just a little more easier than what people really realize. so please don't take this away from us. we pay for it, so we should have the right to keep it. thats why the united states of america is the united states of america!!!!!!

respectfully,

joe martnez
